FLADELAND LIVESTOCK and TWIN VIEW LIVESTOCK **BULL SALE**

2020 MARCH 18

**Johnstone Auction
Moose Jaw, SK**

Sale Time: 1PM CST

**Sale Location : Johnstone Auction
Mart, Moose Jaw, Saskatchewan
4 miles west of Moose Jaw on the
Trans Canada highway.**

WATCH AND BID ONLINE

TERMS AND CONDITIONS:

The terms of the sale are cash or cheque. All settlements must be made with the clerk following the sale before any cattle will be released.

Disputes: Bidding will be re-opened between the parties involved in the dispute. If no further bids are made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

ANNOUNCEMENTS:

All announcements made from the auction block will take precedence over the printed material matter in the catalog. Buyers are therefore cautioned to pay attention to such disclosures.

ACCIDENTS:

Although every precaution will be taken to protect the safety and comfort of the buyers, neither the owner, the auctioneer of Association assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

WELCOME

friends and fellow Cattlemen

It is our pleasure to welcome you to our first joint bull sale! We are excited to be working together to provide you with your next herd sire but also excited to come together as friends. The cattle industry is about relationships and the relationship between our two programs is a great one. We have each utilized genetics from the other over the years which you will see in the offering you're about to sort through. The combination of our operations is a great opportunity for you to access cutting edge Gelbvieh genetics whether you be looking for sheer power and performance, calving ease for your heifer program, maternal strength to create those females or any combination of these.

With Fladeland Livestock moving to an all two-year old spring calving program and Twin View Livestock winter calving to offer yearling bulls, we felt our offerings would compliment each other well this year and into the future.

We're very excited to work with the professional staff at Johnstone Auction. They are a great resource if you have questions about our offering. We are glad to have Darwin Rosso as a sales consultant as well.

Our shared belief in producing the highest quality product possible make Johnstone Auction the place to be on March 18. The bulls will be on display anytime at each of our farms and then at Johnstone's beginning March 17. Please join us anytime for our hospitality including lunch prior to the sale.

Thank you for making plans to be with us as we begin this new joint venture together.

Yours in Gelbvieh,
The crews at Fladeland Livestock and Twin View Livestock

Welcome to the 2020 bull sale. Our transition from selling yearling to long yearling bulls is finally complete.

This year, all our sale bulls will be long yearlings. These bulls were born on grass and weighed with a scale to record their birth weight. As yearlings, they run on grass from early May to late October. These bulls are developed to sell as long yearlings and no bulls have been sold prior to this sale. We are striving to produce bulls that are easy fleshing, have good structure and increase longevity. They will also be able to cover extra cows due to their extra age and maturity.

We are very excited to join forces with our good friends from Twin View Livestock – Aaron Birch and Joe Barnett. This offering will be very high in quality from both operations. This sale will be a great opportunity to capitalize on your bull buying needs whether it be long yearlings or yearlings, black or red, calving ease or performance. This is truly a “one stop shop bull sale”.

If you are unable to make the sale or have any questions about our bulls or want to have a look for yourself please call Del at 306-869-8123.

Thank you for your past, present and future support.

Wayne & Del

AJB Farmstrong 28C, Sire

- Soggy, deep ribbed, hairy and good footed. This bull will make wicked females
- We purchased his sire AJB Farmstrong 28C from Amy Bonchuck to give us high quality in our half blood program

FLAD Fladeland Grizz 265C,
 Sire of Lot 228F and 269F

- 228F is a bull we think highly of. He is a very complete and well balanced. He has extra muscle, added rib shape and is smooth made. We think he is the type of bull that will work well on heifers and cows.
- Both his paternal and maternal Grand sires Fladeland Bootlegger 21A and SLC Bear 176Y have sired functional, and highly productive females that have excellent udders.
- Homo Polled

Thank You
**FOR PURCHASING OUR 2019
4-H STEERS**

Welcome to the 2020 edition of our bull sale! We are thankful for the continued support of our loyal customers, thankful to the new ones expressing interest in our program or the breed for the first time and thankful to be working with the Fladeland family. We are as passionate as ever in our pursuit to create and raise the highest quality Gelbvieh cattle in the country and it is the work we take on every day.

We were once again challenged in 2019 by factors out of our control. Since our move to Saskatchewan, many incredible records have been set including the coldest February in history, the hottest August, and the driest summer ever recorded. We could do without each of these new records however they proved the resilience of our cowherd, ourselves and you!

We are always looking forward and constantly working toward setting and achieving goals we set for ourselves. A major one for 2019 was creating Function and Finesse, a Gelbvieh female sale held here at Twin View. October 18 was an incredibly satisfying day for us as we marketed females from Washington state to Ontario with the help of some of our best friends in the business. We believe this event was positive for our program and the breed and we're looking forward to Function and Finesse 2.0 on October 16, 2020. Please join us!

We take great pride in displaying our program in the show ring to promote our work and this breed. We are truly humbled to have raised the 2019 National Champion female who also won Agribition along with the Agribition Champion Bull and Reserve Champion female. We say it all the time but it's important to repeat that we do not raise show cattle. We appreciate the acceptance of our hardworking, honest, production oriented cattle in that environment but we have never and will never allow show results to dictate the direction of our breeding program.

As always, we've eliminated all the guess work we can about your purchase by DNA parentage verifying every bull, doing polled and colour tests and raising them under the Verified Beef Production Plus protocols. The bulls have been fed a pelleted, low starch ration with high quality hay to grow and not fatten. These are not feedlot animals so we aren't worried about massive weight gain. You're buying a breeding bull, not our feed bucket! The bulls are kept athletic in a large run and are always walking ready for your pastures. If we wouldn't use him ourselves, we would never expect you to so buy with confidence!

As always, you're welcome here at Twin View anytime prior to the sale. We would be proud to show you the mothers, something that often isn't encouraged. Seeing your herd bull's mother should be a key selection tool. twinviewlivestock.com and our facebook page are great places to keep up to date on our program and see videos of the bulls.

Thank you for your interest and your support. We are humbled and thankful every day!

Aaron & Joe

Left: AWB Birch's Macy 37A, Dam of The Boxer
Right: AWB Twin View Mayweather 39F, Son of The Boxer

The Boxer was special from day 1 and has taken us on quite a ride! Of course we're very proud of his dominant show career but we are far more thrilled with his production record. The very first daughters of The Boxer calved this spring with absolutely stunning udders and show a world of promise. His first sons last year averaged nearly \$7500 including last fall's Agribition champion, Mayweather who is already following in his daddy's footsteps with production beyond himself. With calves on three continents now, The Boxer consistently adds hair and often darkens colour, he improves foot and bone structure and leaves perfect dispositions. We have and will continue to use him heavily despite being related to much of our cowherd. The Boxer is right for the times and will leave his mark on our breed for years to come!

Twin View Charisma 69G has been one of the most exciting calves in our pasture all summer. His liver red colour, additional length of spine, attractive design and overall balance make him a standout in any pen. We displayed him in Red Deer at the People's Choice Bull Futurity where he was selected as a finalist by our peers. Typical of all Boxer progeny, he is great footed and awesome haired. His mother is a stunning beast who sent a son to Matthew Jacobson and a full brother to Golden Buckle Gelbvieh in North Dakota last year. She just gave us a third full brother who looks equally as promising. Homo polled, non dilutor, great disposition and the list goes on. Charisma is certainly a high quality individual who has all the potential in the world to make valued contributions to any program and the breed!

Dam of lot 31
Right: AWB Twin View Sugar 26F,
Full sister to lot 31

Twin View Kingpin 12G is one of the larger framed bulls in our pen with plenty of stretch and extreme soundness. His dam is a great uddered female with an impressive track record and has achieved Dam of Merit status. A maternal sister is working in our herd, another sold to Fir River Livestock and his full sister is the bred heifer we campaigned last fall. Our goal is not only to have our cattle succeed in the breed but within the cattle industry and Sugar 26F did just that. She commanded the attention of producers in all breeds as she became National Junior Champion female and Agribition First Lady Classic Gelbvieh Champion and Reserve Supreme female in the Gelbvieh show. Kingpin is sired by The Boxer who certainly has taken us on quite a ride. Kingpin 12G is a slam dunk when it comes to adding pounds to your calf crop and heifers to your replacement pen. Keep every daughter!

of lot 32
Right: FRL Fir River Crosby 806A -
Sire of Lot 32

Twin View Ground Zero 65G is the only son of Crosby on offer this year. Crosby played a key role in our breeding program and became one of the most impressive individuals to walk our pastures thus far. He has left us with some of our strongest young females. Ground Zero tracks much the same as Crosby in his overall softness of design but with added hair. Ground Zero was mothered by one of our larger framed Yoicks daughters who has reached Dam of Merit status. She has a daughter in our herd and sons working for the Bertschy family and Lomond Grazing. Ground Zero is a very well rounded bull complete with a balanced EPD profile that could work well on first calf heifers as well as cows.

to lot 34
Right: AWB Birch's Blk Powder
37Z, Grand sire of lot 33 & 35

Twin View Guinness 23G is the only son of Bojangles in our offering this year out of a first calf heifer. Bojangles sons are always popular with our bull customers. Guinness combines two of the most influential black sires we've used in our herd with Bojangles and Blk Powder. Both consistently improved calving ease and maternal traits without sacrificing performance. Guinness 23G's light birthweight, EPD profile and pedigree make him an ideal candidate for action in the heifer pen. We believe the best calving ease sires are smooth made, long bodied and narrow skulled. Guinness is all these things in a structurally sound package.

 Grandsire of Eastwood

We're really happy with this first group of sons from Eastwood. When we first saw him in Red Deer at the Wish List Bull Jackpot, we knew we had a place for him in our program so jumped on the opportunity to purchase him. We were excited when he was selected as champion the following day. We admired his incredible mass, overall softness and major performance. We used him heavily on both purebred and commercial cows and he left us with primarily bull calves. We have just two heifers in the replacement pen and they are both awesome! The steer calves we marketed last fall were extremely impressive and built just like him with big hips and high growth curves. This group of sons are great candidates for breeding mature females if you sell calves by the pound!

 Dam of lot 34
 Right: AWB Twin View Bad Habit
 47E, Maternal brother to lot 34

Twin View Gran Torino 15G is a real brute with plenty of power and is the ideal candidate to run on Angus based cows. He'll maintain colour but add hair and dimension to show buyers your calves are cross bred with hybrid vigour. He was born a twin (raised as a single) out of the never miss Dam of Merit, Boe 189A. This makes him a maternal brother to Bojangles 24C a past high seller to Hawkeye Ranch who we also use ourselves, Knock Out 25D who we used ourselves, and Bad Habit 47E who was another high seller to Triple S Cattle. A maternal sister was also one of the feature females in Function and Finesse last fall. The Eastwood sire has proven to be an absolute power player! We used him heavily as a yearling including exposure to many of our commercial cows. The steer calves he left us on those cross bred cows were outstanding and we're sure Gran Torino will work much the same as Eastwood has.

 Granddam of lot 35 & dam of
 lot 44
 Right: AWB Birch's Blk Powder,
 Grandsire of lot 33 & 35

Twin View Invictus 110G is a really cool package! He is extremely stout, hairy and wide topped. His mother hails from the Rainbow cow family and is a maternal sister to lot 44. With his great presence and sharp look, he was short listed to be a part of our show string as a junior calf. With Blk Powder, Ricco, Tiree and 5D in the maternal pedigree his ability to make females and sire high end progeny is limitless. If you are looking to decrease frame size and improve stoutness and structural soundness in your cow herd take a hard look at Invictus. We're sure you'll be impressed with what you find.

Left: JSJ Catchy 2C, Dam of lot 36
Right: AWB Twin View Rush Hour 91E, Maternal brother to lot 36

Twin View Mystic River 94G is a bull we've had our eye on all year. He is ruggedly designed and has all the look of a dominant herd bull much like his sire, Eastwood. We absolutely love Mystic River's mother and consistently count on her for a high end product. We purchased her from JSJ Livestock as the high selling female in their spring sale after a successful show career and we are so pleased we did. Her first powerhouse son, Rush Hour 91E, was selected by Ledgerwood Gelbvieh of Washington while still nursing his dam. It is no surprise that she has excelled being sired by the female maker Get'N'Go 90J. This dark red, homozygous polled bull is a real candidate for siring top end progeny in your operation.

Twin View Josey Wales 87G was our second display bull for the Futurity and was the third member of our display pen at the Medicine Hat Pen Show. He is densely constructed, big middled, easy doing and really soft made. A unique feature is that he is from two black parents, making him guaranteed diluter free. He is backed by an Off Road daughter that is a beautiful young cow with the perfect udder and foot structure typical to the Off Road progeny. Her son sold last year to Kristy Creek Gelbvieh as one of our feature black bulls. You can expect to see more from Trinity 92D in the future. Josey Wales is set to be a high performance sire whose daughters are full of value as well.

 Right: SLC Outback 142X, Sire of Drake

Drake has become a trusted standby for us here at Twin View. He's an easy going smaller framed bull who leads the breed in calving ease and birth weight values. It's very rare to see a Drake calf born because they come fast and easy. His first daughters calved this spring with really ideal udders and they're great mothers. We admired his mother at Goodview from the first time we saw her. She is moderate framed but massively designed. Like her, Drake has a great trouble free foot and is very easy doing. This group of sons carry his calving ease and birth weight traits including his smaller skull design and are very qualified for breeding your heifers!

Twin View Meridian 76G is another typical Drake son who is moderate made and extremely sound with lots of hair. He ranks at the top of the breed for birthweight and calving ease values along with an actual birthweight of 73 pounds making him a sure bet for the heifer pen. We can't say enough about the consistency Drake has sired in his offspring. Keeping heifers sired by Meridian would be a wise move with the maternal backing on the top and bottom sides of his pedigree.

Twin View Check Mate 50G is a moderate, soggy, stout made rascal raised by a two year old female. We are always so proud when our young cows put bulls into the sale pen and compete with the mature cows in terms of production. If you trace back, you'll find Gold Star Polled 5D on both the top and bottom of the pedigree. Check Mate's sire, Drake, has done such a great job for us in the heifer pen. It's rare to see a Drake calf be born as they come so easy and are up and running in minutes. Check Mate's granddam is one of our most dependable and favourite females, Nina 79W, who has put many sons in the bull pen and is going strong at 11 years of age. We love the way this bull is put together and are very confident in the herd bull he's about to be.

 Right: AWB Birch's Bojangles 24C, Grandsire of lot 40

Twin View Third Degree 112G has been another bull we had our eye on for a potential junior calf in the show string. He will just be a year at sale time but this homozygous polled standout has a world of potential from heifer safe calving ease to ample performance for mature cows. His mother is an ET daughter of Bojangles and our donor and matriarch Lexxus, who came from Fladelands. Both have done a great job for us and we believe 88E will follow in her mother's footsteps. This genetic mix you gets us excited for all he has to offer the industry. This is one to not let get away and use with the highest confidence.

 Right: AWB Twin View Malibou 6E, Full sister to lot 41

Twin View Silent Type 60G is a calf Joe has really liked from a young age. The mating between Drake and Malibou 199D was very intentional to recreate his full sister who sold in Function and Finesse last fall to Ledgerwood Gelbvieh of Washington. She calved with a beautiful udder just like Silent Type's mother. Silent Type's granddam was selected by MacDougall Ranch of Barriere, BC a couple years ago to be a foundation female for their developing purebred herd. Silent Type is the larger framed, stretchier made of the Drake sons. With a 79 pound birthweight and sky high EPD's calving ease and birthweight, he is a great candidate for the heifer pen.

Right: AWB Twin View Gusto 49G ET, Son of Resilient

Resilient comes from the Gustin program in North Dakota, an operation we have been following for some time and have a lot of respect for the consistency of the cowherd. We've had the opportunity to tour several times now and love the cow family behind Resilient. We used him on both red and black cows and found him to calve well with moderate birth weights. We flushed the great Baha 35B to Resilient and showed a son from that flush last fall. We now partner with MacDonell Farms on that exciting breeding piece. We also have a handful of very high end Resilient daughters in our replacement pen that we feel have a lot of future to them. These three sons are backed by strong cow families on both sides of their pedigree and offer unique pedigrees to most of the Canadian cowherd.

Twin View Recoil 10G and Twin View Resistol 11G are twin brothers from the 218Z mother cow who is big bodied and easy doing. A maternal brother sold to Derrick Zell and we have retained sisters in our herd. Recoil 10G was raised on a different cow, is moderate framed and stout made with lots of character about him. Resistol 11G is longer bodied and bigger framed with added extension when compared to his twin brother. This is the first calf crop we had from Resilient and we are pleased with the results. On two separate tours to Gustin's in North Dakota and we were consistently drawn to the cow family he comes from. Both Recoil and Resistol are DNA tested homozygous polled and homozygous black and they both offer impressive performance EPD tabulations for your mature cows.

 Right: AWB Twin View Rainbow 1F, Maternal sister to lot 44

Twin View Rainmaker 3G is the total package combining calving ease, performance and maternal excellence. He is the real deal! He was a contender for our show pen all year long with his added length of body, ideal design through his front third and big hip. Rainmaker had a short gestation with a light birth-weight from a mature cow who consistently goes above and beyond. The Rainbow females are among our most cherished and his dam 177Z is worthy of donor status, just like her dam who we flushed successfully. 177Z is also the grandmother of lot 35 and had a daughter sell in Function and Finesse to Long Lane Cattle Company. Mark Rainmaker extremely high if you keep replacement females. He is so well rounded and has real value within the industry.

Twin View Tradition 45G ET is a unique individual! Fullblood cattle are extremely difficult to come by. To our knowledge the only two fullblood bulls selling in Canada this year are in our offering. Being homozygous polled makes him particularly unique and adds to his genetic merit. He is sired by a bull named Hard Body who is a son of Gold Star Polled 5D. The fertility on the maternal side of this pedigree is off the charts. His mother, Gayle 32N, flushed exceptionally well (often over 20 #1's) so we began using different sires in the same flush. Lot 46 and Tradition 45G are actually from the same flush. This cow family is also responsible for Canada's newest National Champion female, a granddaughter of Gayle 32N. Unfortunately Tradition 45G did not have the best recip mother so he's been playing catch up since weaning but this is a bull with tons of potential and is a sure fire female maker!

Twin View Foundation 35G ET is a direct son of legendary female maker Gold Star Polled 5D and the prolific donor, Gayle 32N. Foundation is moderate, good haired, big nuted and heavy muscled. An impressive full brother is a herd sire at JSJ Livestock and maternal brothers to Lot 45 & 46 have went to work for ourselves, Twin Bridge Farms, Sandy Knoll Farms in Kansas, Deep Sands Livestock, LMC Farms, Myron Machacek, Marcus Bauer, Hawkeye Ranches and Ridge Lane Ranch. They are also maternal siblings to the 2015 National Champion Female and many more. We are excited to see how their flush mates born in Australia do for Glendale Gelbvieh Stud. Foundation 35G has so much to offer and we're very proud of offer these critical genetics to the breed.
