WELCOME TO OUR 15TH ANNUAL SUN COUNTRY BULL & FEMALE SALE

Since we started this sale, we have had the same goal - to provide breeding stock that can work for commercial and purebred breeders alike. This year's consignment of bulls and heifers have been culled numerous times, with special emphasis placed on structural soundness, so that only the very best are being offered. This set of bulls has been tested by most everything Mother Nature could throw at them, from one of the worst droughts in history, to lots of stormy cold days during the winter. Despite this, the bulls and heifers have performed very well. They are ready to go to their new homes and work for you.

In the past two years many things in our world have changed, but we are pleased that we will be able to have a normal sale with people in the seats. We are going to continue to have the sale cattle available for viewing at Johnstone Auction Mart, on the day prior to the sale and sale morning. If you want to come on those days and then go home and bid from your home computer or by talking with one of our sale representatives, we will try to do everything to ensure that you are assisted in any way we can. Our sale representatives, the owners, and sale staff will also be able to answer any questions you have. A few years ago, we started offering some replacement heifers in this sale. They have been a popular addition, and many of them have gone on to become excellent breeding females in herds across Canada and the US. The heifers selling this year are the same. They can work most anywhere!

We are pleased to have DV Auction providing the live broadcast of our sale again this year. They will have any additional information and the videos of the cattle on their website as well.

We are again offering to take these bulls and heifers back to our farms and keep them for a reasonable length of time until shipping arrangements can be made. If you can pick your bull or heifer up immediately after the sale, we will offer you a discount of \$100 on your purchase.

We will also have videos, current weights, scrotal measurements and ultrasound data on our yearling bulls posted on our websites in the near future. The videos will also be available at www.dvauction.com and www.johnstoneauction.ca.

Grant Alexander (for the Sun Country group)

SALE WILL BE ONLINE BY VIDEO AT WWW.DVAUCTION.COM

Create your Bidding Account with DVAuction!

Go to www.dvauction.com and click on "Create New Account".

Fill in all fields and accept the Privacy Policy & Terms and Conditions. Click on Create New Account.

- On the next screen, click **Apply for Bidding**.
- Choose Option 1) Credit Card Approval or Option 2) Bank Approval

This blue 3/4 Shorthorn bull is a powerful beef bull. A son of Cruiser and out of a good Shorthorn X Simmental dam. He is thick made and has great feet and legs. BW 81 lbs unassisted

Bidding: Each animal will be sold to the highest bidder. Bidding Disputes: The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

Terms: The terms of the sale are cash, unless previous arrangements have been made with the owner. The right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time. If leaving your bull in our care we strongly encourage you as the new owner to insure him.

Insurance: A representative of a major insurance company will be present to care for insuring cattle. Sellers hold no liability for cattle left in their care.

Certificate of Registry: A certificate of registry and transfer will be furnished for each animal.

Announcements: Changes of information contained in this catalogue relating to the animals offered for sale will be announced from the auction box and such announcements shall take precedence.

Health: All cattle will be in excellent health.

Breeder's Guarantee: All animals sold are guaranteed breeders by the owner. Any animal that has not proven itself a breeder within six months after date of sale, if in healthy condition, may be returned to the seller at buyer's expense. The seller reserves the privilege of trying for a period of six months to prove the animal a breeder. The seller at his option may either return the purchase price to the buyer or replace the animal with another of equal quality in full settlement of ALL claims.

All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within the specified time above and any animal returned must be free from disease and in good health.

Retained Interest: In the event that an owner wishes to reserve the right to collect semen from any bull in the sale, it will be announced prior to the sale and from the auction block as well. Semen will be collected at the buyer's convenience and at the seller's expense, and it will only be available for use in the seller's herd.

Liability: Neither owners, sale manager, clerks, nor anyone connected with the sale assumes any responsibility, legal or otherwise for damage of any kind.

Contract: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

Great Guns has done an outstanding job at our farm. We have used him on both cows and heifers without any issues. Last year he bred our commercial breeds that were high sellers at the Shorthorn Alliance Sale. We recommend him to be used on heifers. BW 97 lbs

The "new" North American Shorthorn Genetic Evaluation is now finally completed and you will notice a difference between today's EPDs and those in past years. These EPDs were completed by the American Simmental Association as part of their multi-breed genetic evaluation. These EPDs now have the same "base" as Simmental, Red Angus, Gelbvieh and a growing number of other breeds. As a result, our EPDs can now be compared with these breeds. This means that bull and female buyers can search for genetics from multiple breeds and compare the performance profiles against one another.

Birth Weight (BW)

At the basic level, birth weight is nothing more than an indicator trait for calving ease, but the emphasis on birth weight can be overdone. Economically, over selecting for low birth weights can take us in the wrong direction; cattle still sell by the pound. Use BW EPD in conjunction with calving ease. Phenotypic traits like length of body, shoulder design, head shape, circumference of bone and even frame score play a significant role in determining birth weights and calving ease.

Weaning Weights (WW)

Put simply, weaning weight is the ability of a bull's calf to dry off, stagger to its feet, and grow like mad. Finding a sire with a strong WW that also excels in other economically relevant traits important to your breeding program is a key element to success.

Yearling Weight (YW)

This trait is economically important since it is more indicative of growth potential through market weights taken early in the animal's life. Single trait selection for YW can lead to serious problems that can affect bottom line profit. Mature must be monitored when selecting a bull for performance via YW EPD. Cow maintenance costs, calving difficulty, and even breeding problems can result. YW EPDs can be very influential if you understand your environment conditions or if you are retaining ownership in your calves from birth to slaughter.

2021 Shorthorn Breed Average EPDs

BW	WW	YW	Milk
1.6	51	76	19

Milk

A bull's Milk EPD is determined by his daughter's ability to wean heavier calves than her contemporaries. Just because a cow weans a heavier calf each year does not necessarily mean her Milk EPD should be the highest in the herd. The performance of her calf can also be attributed to the dam's or sire's growth genetics or a number of environmental factors. Milk EPDs can be too high for your environmental conditions especially in severe environmental conditions and can have a negative impact on rebreeding rates.

Bull Warranty

We guarantee to provide you with a sound, fertile bull, capable of servicing a reasonable number of cows. In the event that your bull is a non-satisfactory breeder, the seller will not, under any circumstances, be responsible for more than the original selling price of any bull sold in the sale. The consignors will not provide replacement or credit for any physical injury or mismanagement. Therefore, we stress the importance of insurance on your bull. An insurance agent will be available on sale day.

We also realize that breeding season is also a very busy time on most farms. We would ask that you check your new bulls periodically, so that if there are problems, we can hear about them sooner rather than later. This is equally important for the bull buyer as well. If your bull is not breeding, or becomes injured, it is important to resolve the problem as soon as possible in the breeding season.

ANGUS X SHORTHORN

This bull has it all. Big top, hip and spring of rib. Sound footed bull that gets out there and moves freely. Topped with the blue roan package. BW 84lbs

How Much Can you Afford to Pay for a Better Bull?
Increase in pounds per calf from a top performance bull
X Number of cows bred to him each year
X Number of years to keep the bull
X Expected selling price of calves
= Additional dollars you can pay for a better bull

Example: A bull that will add an additional 30 lbs to the weaning weight of each of his calves mated to 25 cows per year for 4 years and if you sell the calves at \$2.50/ lb
 $30 \times 25 = 750 \text{ lbs} \times 4 \text{ years} = 3000 \text{ additional lbs}$
 $3000 \times \$2.50/\text{lb} = \7500.00

This bull is worth \$7500 more than the average bull who will keep your weaning weights the same. Take this formula and put in your own figures.

This is an ET full sister to HC Hollywood 6H who sold in last years sale at \$24,000 to Major John Gibb, Glenisla Shorthorns, in Scotland. Her recip mom did not handle the drought as good as most of our herd, so 10J was a bit behind at weaning. She is catching up fast now and if she is anything like her 17 year old dam, she will be a great producing female that is fertile, trouble free and productive. BW 90 lbs unassisted
