***= Decision deferred**

The bulls with * beside their information are deferred on their breeding soundness exams. Our veterinarian has checked them and has said that that they have immature age and that they will pass their semen tests very shortly. All the deferred bulls are very close to passing their tests. Some of this issue was caused by the cold weather a few weeks ago and we fully guarantee them to pass their semen test very soon. Most of the bulls that are deferred are under 12 months of age so it is basically an age issue.
